

microflex[®]

939 Fuel system Cleaner

Innovative Multiflex cleaning concentrate for all petrol and ethanol mixtures from E5 to E100 with a highly active cleaning agent based on ROA technology.

ROA technology (reactive organic amines technology):

- ✓ Powerful cleaning formula
- ✓ Innovative agent complex based on particularly reactive organic compounds
- ✓ This results in excellent dissolution properties in all petrol mixtures

Properties

- ✓ Cleans the whole fuel system from the fuel tank to the injector
- ✓ Prevents alcohol-related corrosion
- ✓ In case of fuel-related contamination, it returns fuel consumption and emissions values to the level expected of new vehicles
- ✓ Reduces deposits in the injection area by means of the keep clean effect
- ✓ Cleans inlet valves (for intake-manifold fuel injection), combustion chamber and outlet valves using ROA technology

Application area

- ✓ For all intake-manifold and direct injection petrol engines
- ✓ For safeguarding overall fuel quality
- ✓ For fuel systems exposed to particular strain, e.g. from climatic conditions
- ✓ For eliminating faults due to deposits in the the fuel injection and combustion chamber area
- ✓ At every inspection

Instructions

Add the contents of the can to the fuel tank. Then fill up the fuel tank.

Dosing

Sufficient for up to 90 litres of fuel.
